

Eco Skylight

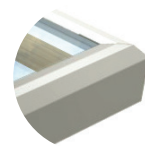

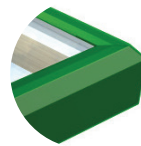

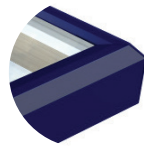

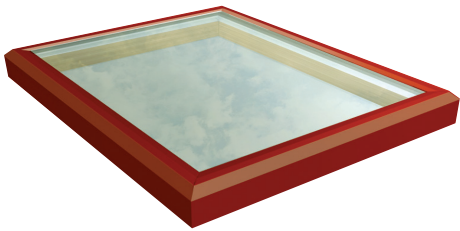

The revolutionary eco skylight offers a new option

The **e**CO Skylight roof window is constructed from energy-saving fully thermal materials. It features a high quality recycled ABS frame, made from industrial plastic waste which is UV-stabilised.

The UV-inhibited glazing has been designed to eliminate UV exposure to any structural parts. The double-glazed units are made from low-emission toughened glass, argon-filled, and a tempered laminate using PVB for high UV block. This ensures fade protection for indoor furnishings – making it suitable for both residential and commercial projects.

- › Low Pitch (multi pitch) 5 - 60°
- › UV-stabilised
- › Fully thermal frame and glass
- › High-spec Adlux 'Harmony' glazing
- › Internal Reveal Options
- › Custom sizes available
- › Double/single glazing
- › low-profile metal outer in choice of full colour range

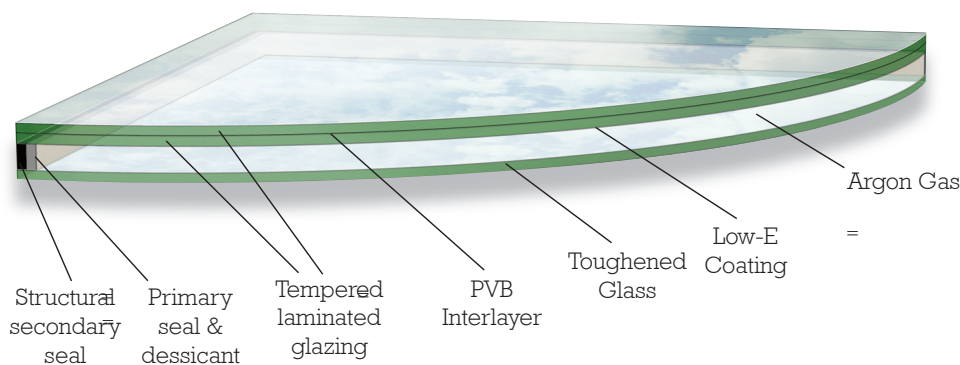

Glazing & Frame

Putting you in Harmony with the elements

The Adlux UV-inhibited Harmony glazing has been designed to eliminate UV exposure to any structural parts. The double-glazed units are made from low-emission toughened glass, argon-filled, and a tempered laminate using PVB for high UV block. This ensures fade protection for indoor furnishings – making it suitable for both residential and commercial projects.

- > Sound reduction – 60% more than standard glass.
- > Fade protection – 99% UV block
- > Winter heat loss and summer heat gain both reduced up to 68%
- > R Value 0.65
- > Full data available on request
- > Vandal proof

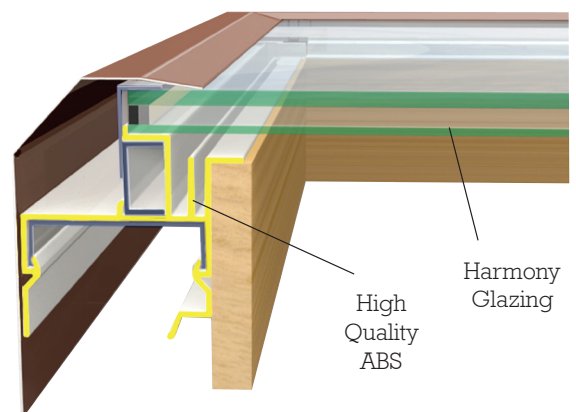

Standard Sizes

Model No.	Overall Size
RWA77	717 x 717mm
RWA86	760 x 610mm
